The Physicians Advocacy Institute’s Medicare Quality Payment Program (QPP) Physician Education Initiative

2019 Promoting Interoperability (PI) Category Hardships and Reweighting Overview
2019 is the third year of the MACRA Quality Payment Program (QPP), under which physicians may choose to participate in an Advanced Alternative Payment Model (APM) or submit data to the Merit-Based Incentive Payment System (MIPS).

MIPS consolidates and sunsets the previous quality reporting programs by the Centers for Medicare and Medicaid Services (CMS), including the Physician Quality Reporting System (PQRS), Value-based Payment Modifier (VM), and the Electronic Health Records (EHR) Incentive program (Meaningful Use), into one program. In 2019, MIPS has four weighted performance categories: quality (45%), based on PQRS; cost (15%), based on VM; promoting interoperability (PI) (25%), previously advancing care information (ACI); and improvement activities (15%).

Certain physicians and other eligible clinicians can have the PI category reweighted to 0% and have the 25% reassigned to the quality category. This resource provides information on the hardship exceptions that can be applied for to have the PI category reweighted.
There are generally two ways for the PI category to be reweighted to 0%. First, CMS may automatically reweight the category for certain physicians and other eligible clinicians (ECs).\(^1\) Second, some ECs may be able to submit a hardship application for reweighting the category.

The following physicians qualify for automatic reweighting to 0%:

- Ambulatory Surgical Center (ASC)-based MIPS ECs
- Hospital-based MIPS ECs (including off-campus outpatient hospital)
- Physicians assistants
- Nurse practitioners
- Clinical nurse specialists
- Certified registered nurse anesthetists
- Physicians lacking physical interaction with patients
- Physical therapists
- Occupational therapists
- Qualified speech-language pathologist
- Qualified audiologist
- Clinical psychologist
- Registered dietitian or nutrition professionals

Note: Reporting the PI category is optional for these ECs. However, if they elect to report data for the PI category, they will be scored and PI will be 25% of their MIPS final score.

Physicians can submit an application by December 31, 2019 for reweighting for one of the following hardships:

- Insufficient internet connectivity
- Extreme and uncontrollable circumstances
- Lack of control over the availability of CEHRT
- MIPS eligible clinicians in small practices of 15 or fewer ECs
- Decertified EHR

CMS will provide additional information on the application process in coming months on its QPP website and/or QPP Resource Library.

\(^1\) For 2019, eligible clinicians are defined as physicians, physician assistants, nurse practitioners, clinical nurse specialists, certified nurse anesthetists, physical therapists, occupational therapists, qualified speech-language pathologist, qualified audiologist, clinical psychologist, registered dietitian or nutrition professionals.
Hospital-Based MIPS ECs Status

To get the hospital-based MIPS EC status and have the PI category reweighted to 0%, you must meet one of the following criteria depending on whether you are participating in MIPS at the individual level or group or Virtual Group level:

- **Individual Physicians** – you furnish at least 75% of your covered professional services in an inpatient hospital, on-campus outpatient hospital, off-campus outpatient hospital, or emergency room setting during the determination period.

- **Group or Virtual Groups** – all MIPS ECs furnish at least 75% of their covered professional services in an inpatient hospital, on-campus outpatient hospital, off-campus outpatient hospital, or emergency room setting during the determination period. **All MIPS ECs in a group must qualify for reweighting in order for the ACI category to be reweighted.**

PI Category Reweighted to 0% and Quality Increases to 75%

If the PI category is reweighted for either of these reasons, then for 2019, the weights for the four MIPS categories will be: quality (70%), cost (15%), PI (0%), and improvement activities (15%).
